No Relationship to Borrower (SECRL1)

October 19, 2008

1.0 NSLDS No Relationship to Borrower Extract File Layout (SECRL1)

The *No Relationship to Borrower Report* (SECRL1) provides ED and the PDPA a list of the organization's online users and the financial aid recipients they looked up where no relationship currently exists on NSLDS between the organization and the recipient. Examples of relationships include receiving a grant at the school, guaranteeing a loan, servicing a loan, or reporting the student on an enrollment roster. Consider the time period needed for the relationship to be established on NSLDS when specifying the begin and end dates for the report. Sort options include User ID, SSN, and Last Name/First Name.

This section contains extract file layouts that list the header, details, and trailer records for the extract version of the report. Each online extract request is used to generate one header record, one or more detail records, and one trailer record. Each record layout table contains the position, the data element name, description, field format, and length.
